

## **MATERIAL SENT AND TO BE RETURNED FOR THE COLLECTION OF *AESHNA JUNCEA* SAMPLES SUMMERS 2025-2026**

**Each envelope corresponds to one of the five sample collection areas. If you have more than one sector, you will have received, or will receive, more than one envelope.**

### **In the envelope you received, you will find**

- Sample collection protocol
- including the procedure for on-site data collection, entry and transmission
- 5 pre-numbered tubes filled with alcohol in an isothermal bag. As soon as it is received, the isotherm bag is placed open in the fridge with the tubes upright to prevent evaporation
- An ice pack to be placed in the freezer for field collection and sample return
- A stamped, self-addressed return envelope

FNE Haute-Savoie  
84 route du Viéran  
74370 PRINGY

### **Once you have collected all five samples, place the following items in the self-addressed, stamped envelope**

- The isothermal bag
- In one compartment, place the tubes containing the samples (5)
- In the second compartment, place the ice pack that was taken from the freezer

Post the envelope before daybreak on Monday if possible to reduce transit time and ensure that it does not remain in the mailbox over the weekend.

**THANK YOU FOR TAKING PART IN THIS PROJECT! IT WOULD NOT HAVE BEEN POSSIBLE  
WITHOUT YOU. Marie 😊**
